About ProQuest

Background

ProQuest Diagnostic Laboratories is a wholly Namibian owned company registered under the Close Corporations Act. Established in 2015, ProQuest is a Biomedical Science company with the focus on clinical tests, research, innovation and manufacturing. We have a licensed medical laboratory located in Oshakati, Oshana Region and an administrative office in Windhoek. Our Oshakati laboratory offers clinical tests in the disciplines of clinical chemistry, hematology, microbiology, serology and molecular diagnostics. We also manufacture microbiology culture media for in-house use and for sale. ProQuest aims to enhance the level of quality in the health industry in Namibia.

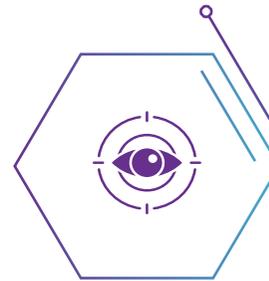

About ProQuest

Mission

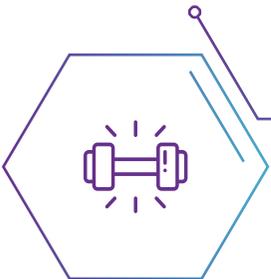

Our goal is to use evidence-based medicine to enhance the diagnostic outcome.

Vision

To establish ProQuest as the leading innovative force in the evolution of Medical Science in Namibia.

Strengths

- Highly qualified, experienced and committed personnel
- Vibrant and innovative team
- Invested in complying with quality standards and Good Laboratory Practice
- Committed to local capacity development
